T 200

T 250

The efficient banknote feeder enables the insertion of big stacks of banknotes.

rapidcount T 200 / T 200 / T 250
Banknote counters

The rapidcount T banknote counters is the optimal solution to count medium or high volume of banknotes. Big stacks of banknotes can be placed in the efficient banknote feeder, also during machine operation to continue a trouble-free counting process. Three different models are available, for either sorted or unsorted banknotes. The rapidcount T200 counts and tests trustworthy sorted banknotes. With a speed of up to 1000 banknotes per minute, this model will quickly display the accurate counting result. The rapidcount T250 is the perfect alternative to count unsorted banknotes. The machine displays, aside from the quantity, the value of the counted banknotes. The report button displays the detailed result of the complete counting process. The rapidcount T200 and T250 carry out a complete authenticity test with a 100% detection of counterfeit Euro banknotes. The magnet code detection of the rapidcount T250 also provides the exact value of each banknote. The rapidcount T100, suitable for all currencies, detects the UV features found in any worldwide currency.

The user-friendly operation permits a direct start of the counting process, without having to read an instruction manual. The self-explanatory operation guidance simply conducts the user to the complete results.
